TERMS OF REFERENCE FOR THE APPOINTMENT OF BIDDERS FOR DAY-TO-DAY GENERAL MAINTENANCE OF LIMPOPO COGHSTA OFFICES FOR A PERIOD OF THIRTY-SIX MONTH (36)

1. INTRODUCTION

The Department is in the process of establishing a Database for potential service providers for general building maintenance of its offices across the province. The service providers shall be classified into the following four (4) categories and the service provider can choose the category qualified for by selecting in the table below:

CATEGORY	SERVICE	SELECT
Category A	Electrical	17-12-1-12-12
Category B	Mechanical	
Category C	Building wet services (Plumbing)	
Category D	General building maintenance (roofs, ceilings, floors, walls, etc)	1.63

2. BACKGROUND

COGHSTA Limpopo is committed to ensuring that the environment at head office, Districts & service point Offices are conducive for delivery of services and always working. The need for repairs of services at COGHSTA Offices has increased and this will necessitate that a database of service providers be established to expedite the procurement process of these services in order to ensure quality service and timeous delivery.

COGHSTA has various offices which includes Head Office and Districts Offices. A significant number of existing facilities are in a poor condition. Most of the state-owned buildings are not well maintained.

The biggest challenge with maintenance is in relation to all the facilities that COGHSTA is occupying, leases, (DPW&I) which gives the landlord an obligation to maintain as stipulated in the lease agreement.

Most of the office buildings do not comply with the requirements of the Occupational Health and Safety Act, and not properly maintained, resulting in dilapidated buildings, not accessible to people with disabilities.

Ergonomics studies have over the years proved that well maintained facilities have a high impact on the quality of service. Employees in a good environment tend to perform more than those who are exposed to dilapidated work environment. COGHSTA offices have poor lighting, air-conditioning and ablution system which are basics requirements for a productive environment.

3. PROJECT BRIEF

- 3.1. COGHSTA office accommodation is deteriorating. The lack of day-to-day maintenance has contributed immensely to poor office accommodation and noncompliance to occupational health and safety.
 - 3.1.1. Appointed service providers will be expected to execute day-to-day maintenance in the form of plumbing, general building, electrical and mechanical works as and when required at CoGHSTA Head Office and offices across Limpopo Province to render offices safe, secure and functional in terms of the infrastructure.
 - 3.1.2. The number of offices to be targeted will be based on the planned and unplanned maintenance needs as they occur. The needs may arise as a result of required preventative measures, aging of the buildings, natural and/ or man-made events or conditions.
- 3.2. It is well evident that if routine maintenance is neglected or deferred, defects are aggravated and items that could have been dealt with at a relative low cost can deteriorate and create more costly and serious repairs. The failure to perform needed repairs could lead to asset deterioration and ultimately asset impairment such as cabinets and air-conditions in our offices.
- 3.3. Infrastructure maintenance must be regarded as a strategic tool to promote improved service delivery to unlock funding to extend infrastructure to historically disadvantaged communities, and to support the nation's economy. Maintenance of existing infrastructure should not be seen as of secondary importance to the apparently more attractive prospect of new infrastructure.
- 3.4. Maintenance has been classified into two categories which is planned and unplanned maintenance:

3.4.1. Planned maintenance

Planned maintenance has three sub-categories which are as follows:

- 3.4.1.1. Preventative Service Maintenance The actions performed to prevent failure by providing systematic inspection and monitoring to detect and prevent incipient deterioration or failure and includes testing to confirm correct operation.
- 3.4.1.2. **Condition-based Maintenance** Corrective maintenance work performed as a result of significant deterioration or failure, to restore an asset to its required condition standard. The work may be programmed as a result of condition assessments or as random additions to the program based on priority.

3.4.1.3. Statutory Maintenance – Both Preventative Service Maintenance and Condition based Maintenance may contain elements of Statutory Maintenance which is defined as actions performed to provide the minimum level of maintenance to meet legal and other mandatory requirements contained in the Occupational Health and Safety Act and COIDA.

3.4.2. Unplanned Maintenance

Unplanned maintenance has two sub-categories which are as follows:

- 3.4.2.1. Routine & Breakdown Maintenance Incident Maintenance and reactive maintenance actions performed to restore an asset to operational condition, because of an unforeseen failure. Toilet blockages; Water leakages, e.g. leaking water pipes, taps, valves and cisterns; Exposed electrical wires; Cable and water pipes thefts; Freak conditions, e.g. minor storm damage, riots.
- 3.4.2.2. **Incident Maintenance** actions to restore an asset to an operational or safe condition because of property damage resulting from storms, fire, forced entry and vandal damage.
